Project Report: CSR Center Student & inventory Management Web Portal

Trainee: Sneha Kulkarni (COPA, TRN-CP-007) | Version 1 - first draft

Aim

To make a web portal for student records and inventory at the CSR centre.

Work done

I made student and inventory forms using Python, HTML/CSS and SQLite. I added a few sample records and displayed them in tables. The pages open in the browser.

Conclusion

The basic portal works. More testing and documentation are needed.
